Sirs, Please give careful consideration to the request by QWal-Mart to get into the banking business. This company is fast becoming a monopoly in every facet of retailing and the handling of billions of dollars in America's money. They take advantage of the lower income segment of America. I do not believe they can be trusted to when it comes handling the money of a community, they could surely end up controlling entire towns in this counrty a scarey thought.

Thank You for being deligent in consideration of the far reatching concerns of this matter.

Sue Martin
